RE: **Precautionary Flood Measures**

The City of Jamestown is working with the US Army Corps of Engineers in evaluating the river releases associated with the Pipestem and Jamestown Reservoirs. Based on the latest data available, the City of Jamestown is sandbagging and planning the placement of sandbag levees to accommodate a planned combined release from the two reservoirs of 2400 cubic feet per second (cfs).

The City began its sandbagging operations today at the Jamestown Civic Center parking lot. Placement of sandbags may begin as early as Friday, October 18, 2019.

The City of Jamestown anticipates placement of sandbag levees to be completed by Tuesday, October 22, 2019.

If City property owners have concerns or questions, please contact City Hall at 701-252-5900 or email at info@jamestownnd.gov.
