

## **DEMOLITION GUIDELINES**

### **Sec. 9-15.2. - Filling of excavations following destruction of building by wind, fire, etc.**

Within ninety (90) days after total destruction of any building by fire, explosion, tornado, wind or any other cause, any excavation exposed thereby shall be compactly filled to the ground level with earth, rock, brick, concrete or any other suitable inorganic material. An extension of time may be granted if a building permit is secured. In the event of noncompliance, the city engineer shall cause any such excavation to be filled, either by the city or by an independent contractor. The owner or agent of the owner shall be billed for the actual cost thereof. If such bill is not paid when specified therein, the amount thereof may be assessed against the premises and collected and returned in the same manner as other municipal taxes are assessed, certified, collected and returned, all in conformity with section 40-05-01.1 of the North Dakota Century Code.
