Police Chief Edinger presented information about the necessity of a south location for a public safety building for fire and law enforcement, including evidence storage, some of which is stored for many decades in five different locations, some very large evidence, and some which requires climate control. Chief Reuther discussed the necessity of service radius for fire protection and ISO ratings, some areas of the city like the JRMC, currently not within the service radius, and other areas in the west and southwest, if developed which are also not in the service radius unless a south station is established. Heinrich asked staff to continue to gather information on this matter including what buildings we can sell, what buildings might be available and going to a community vote.

Kamlitz noted that City Hall is 31 years old, the south side fire station is 37 years old, the law enforcement center is over 30 years old, and the court house is 57 years old. Kamlitz stated that we need to consider maintenance and improvements.
