**City of Jamestown – Snow/Ice Removal- Commercial Properties**

When clearing, pushing, or piling snow and/or ice on any commercial property, including apartment buildings, with a commercial dumpster, **you MUST clear a path around the dumpster** so garbage trucks can access them. There MUST be a **MINIMUM of 3' of clearance** around the dumpster.

If snow or ice has not been cleared around your dumpster, your garbage may not be collected that day. It is the responsibility of the property owner to haul any uncollected garbage to the Baling Facility or wait until the next collection day. The garbage trucks will NOT return once the routes are completed for the day.

Following a significant snow fall or storm and you are unsure if garbage/recycling routes are on time, you can check our website [www.JamestownND.gov](http://www.JamestownND.gov) under 'current PSA's' or you can follow our Facebook page (City of Jamestown-Government).

If you'd like to be added to our Public Service Announcement email list, you can contact Kirsten Domek at [kdomek@JamestownND.gov](mailto:kdomek@JamestownND.gov) or the City inbox at [info@JamestownND.gov](mailto:info@JamestownND.gov).

This is meant to be a friendly reminder and so everyone is on the same page. Please share this information with any and all staff or anyone you know that moves snow. This will also be posted online as well for reference.

**Thank you for your understanding and cooperation on this matter! Thank you for helping out our community!**
